P rince's Metallic Paint.

EUREKA MILLS, GALLIPOLIS, OHIO. ANINDESTRUCTIBLE COATING

FIRST NATIONAL BANK GALLIPOLIS, 180%, TIN AND WOOD.

A TTENTION is respectfully called to the above mentioned Paint, and the qualities upon which are based its claims to superior advantages, established by the most incontrovertible evidence as to fact, as already fully demonstrated in this and neighboring cities by many of the largest Gas Companies, Iron Establishments, Iron Safe Manufacturers, Ship Builders, Painters, Su-gar Refiners, Carriage Manufacturers, Build-ers, Steamboat and Railroad Companies, Roofers, etc.

It consists of seventy-two parts Oxide of Iron, and twenty eight parts Cement Lime Stone, in the one hundred pounds. The Ore from which this Paint is manufactured is from a vein discovered in Carbon County, Pa, which is overlaid with hydraulic

Family Flour,

COUNTY, Fa, which is overlaid with hydraulic cement lime stone, through which the waters of ages have percolated, and which in connection with the Iron, gives to it the peculiar property of withstanding heat and moisture, which no other of the so-called metallic paints possess.

paints possess.

It has much more body than red or white lead. It is warranted perfectly water and fire proof, and to withstand a greater heat on metals, without scaling, than any other paint in use; hence it is unquestionably the

Best Coating ever applied on Steam Pipes and Boilers, Where it is proven that even Red Lead Will

It is a perfect cover for ships' bottoms, of iron or wood; and all kinds of iron, tin, brick or wood work, out-houses and canvass coverings. It prevents and arrests the corrosion of metals, and is not affected by the action of salt, gases, acids or ammonia.

It hardens under water, as has been fully demonstrated by its application to gas hold ers, by many of the largest Gas companies in the United States; which companies, have thoroughly tested its properties as herein claimed, pronounce in its favor over any other paints in the market, even though sold at double its price.

As a coating for patterns of iron or wood, when mixed with shellac, it is much superior to beeswax, oil, or shellac alone, as has been proven at the largest foundries in the country.
For patching boilers and making joints, it is considered superior to red lead, or any other preparation.

er preparation.

For cleaning metals it takes the place of crocus, rouge and emery, being better and cheaper.

This Paint requires no more oil than dry lead or zine, and much less than the ordina ry mineral paints. It is free from any waste, and possesses a spreading and covering power unequaled.

All orders or communications, by mail or

otherwise, will receive prompt attention.

on the double-quick and threw themselves in front of the advancing rebels, and at the same moment we the finest dust, and scattered through heard the cheers of the Division of the universe, there would not be an

who went into the fight, 1,600 lay upon the field dead or wounded. I have been led to place this matter upon record for the reason that it was the battle which decided the fate of Vicksburg, and that it has not received that description in general history which its importance demands. I have not endeavored to

trace the part taken by any other Division save that to which I belonged. Headley, in his History of the Rebellion, speaking of this battle says: "Hovey's Division bore the brunt of the battle," but he scarcely says a dozen words about the battle. I may hereafter have some further incidents to relate of this battle, but as I have already occupied too much space, I will not at the present

doemed city of Vicksburg, will for get the battle of Champion Hill, or, as it is sometimes called, Baker's Creek. Certainly no member of the 3d (Hovev's) Division of the find. And there was so mean he always carble a law as so mean he always carble a law, when he self; and he did so, taking a bountiful quantity, in order to get his money's worth.
